PROFESSIONAL SUMMARY

Frontend Developer specializing in React.js and Next.js with 2+ years of experience building fast, responsive, and user-focused web applications through clean, maintainable code and performance-driven design.

WORK EXPERIENCE

Frontend Developer | **Websultanate Software Technologies Pvt Ltd**   *April 2024 - Present*
Develop responsive web applications using React.js, ensuring optimal performance across devices and browsers. Create intuitive user interfaces with Tailwind CSS and Bootstrap for enhanced design consistency

Key Frontend Contributions:

- Implement RESTful API integration for seamless data flow between frontend and backend services
- Build dynamic single-page applications (SPAs) using React.js with component-based architecture
- Develop server-side rendered applications using Next.js for improved SEO and performance
- Integrate third-party APIs and handle asynchronous data operations with proper error handling
- Optimize application performance through code splitting, lazy loading, and bundle optimization
- Implement state management solutions using Redux Toolkit for complex application state

Associate Software Engineer | Mphasis | November 2023 - March 2024 • Completed intensive MERN stack training with hands-on full-stack development experience • Led development team to develop and deploy live project applications successfully • Applied problem-solving skills to deliver high-quality solutions in a fast-paced environment

---

Projects

Flight Modes | Frontend Developer
Tech Stack: Next.js, React 19, Redux Toolkit, Tailwind CSS

- Built a highly responsive flight management application with seamless UI components and REST API integration for dynamic data handling.
- Engineered global state management with Redux Toolkit for fluid user interaction and swift updates.

- Developed robust multi-language support and integrated multi-color theming, enhancing accessibility and user personalization.
- Optimized architecture for performance and scalability with best-in-class logic building and modular design.

Matrimonial Platform | Frontend Developer
Tech Stack: Next.js, React 19, Tailwind CSS

- Designed and developed a modern matrimonial site with fully responsive, reusable UI components and intuitive workflows.
- Added support for multi-language localization and multi-theme color customization, providing users with inclusive and accessible options.
- Integrated APIs for key features such as authentication, profiles, and search filters, ensuring a secure and functional experience.
- Focused on clear logic-driven design, maintainable code structure, and consistency across all platforms.

ICE-BET (Sports Betting Platform) | Frontend Developer
Tech Stack: React.js, Tailwind CSS

- Led frontend development of a sports betting platform, focusing on interactive and intuitive UI tailored for diverse betting flows.
- Implemented advanced multi-color theme options and language localization for broader audience reach and improved engagement.
- Designed UI components with adaptive responsiveness, accessible navigation, and clean integration prep for backend service expansion.
- Prioritized best practices for code maintainability, modular architecture, and streamlined user experience across devices.

TECHNICAL SKILLS

Frontend: React.js, JavaScript ES6+, HTML5, CSS3, TypeScript, Redux Toolkit, Next JS
Styling: Tailwind CSS, Bootstrap, Responsive Design
Tools: Git, Figma, VS Code, Postman
Concepts: Object-Oriented Programming, Functional Programming, State Management
